Amendment of TALENT Sanitization Manual

1. At the time the TALENT Sanitization Manual was rewritten it was intended that the new manual represent a consolidation of all previous instructions on this subject. There was no intent to place additional restrictions, not previously established, on the exploiters. However, it has come to our attention that paragraph 5 of annex B does in fact impose additional restrictions which will cause serious difficulties in the target materials production program. Although the previous paragraphs of this annex permit TALENT-derived information to be displayed on the chart, paragraph 5 as written would prohibit describing the installation so annotated without the availability of supporting documents outside the system.

2. It is recommended that COMOR approve the amendment of the manual to delete paragraph 5 of annex B as written and substitute the following:
